

Industrial
carpentry and services

Taking care of the changing needs of our customers, we've recently had to deal with a growing request of equipments made in carbon steel, complementary to the usual Consol supplies. Due to meet this growing request, a new business unit for carbon steel jobs processing has been founded. Plentec is focused on manufacturing carbon steel medium-heavy executions, being able to satisfy machines manufacturer requirements, from components production to basements and structures. The production area is extended on a covered surface of 1000 squared meters and the operation processes are monitored through the MES, fully integrated with the ERP, which allows Plentec to comply with Consol standards.

Plentec S.R.L
Headquarter: Reg. San Vito 102/G - 14042 Calamandrana (AT) - ITALY
Work Shop: Strada Statale 88/B - 14033 Castell'Alfero (AT) - ITALY
